Change in Forty Years.

Bishop Scanian covered a large part of Nevada during his recent trip, much the traveling having been done by lage coach. He was much impressed the title traveling having been done by lage coach. He was much impressed the title development of the state, and entrasts it with Nevada, particularly we aunthen part, with the Nevada he rest met almost forty years ago.

I now find rathroads would never be all, said Bishop Scanian last night. The camp of Tonojash is, I believe to most advanced milning camp I have an during the almost forty years exceivisce I have had with mining campes the proposition in appearance. With the agy modern improvements, the fine hiddings, the cement aldewalks which loss are now laying one might imagine one particularly a city of tents, but the compast to be a city twenty years old used of a mining camp three or any modern improvements. Guidfield, newer still, as many fine buildings and tents have most happeared. Builfing is practically a city of tents, but it is only a second a wenderful place for automo-flex, you see them all about. I believe I saw more automobiles in proportion to population during this trip than ever saw in my 2fe.

New Railroad Will Help.

### New Railroad Will Help.

The people there appear to be prosperous. They expect great things from the new line of railroad to be built from Las Vegas. As an evidence of the intention of the railroad to hurry construction work, I saw railroad the scattered on the line, and I understand grading is to be rashed.

"I knew Nevnda in the old days, during the great boom in Ploche. At that time the people of Nevada, rough though many of them were possessed a great charity and were as broad-minded as any people I have ever known. That saids I find still exists among the people of Nevada. They are full of hope are susception.
